

CLEANING EMECO FURNITURE

All our products are designed and built to last. Part of that is ensuring they can be cleaned to keep them looking good for a long time and to help maintain a healthy environment - in public settings or at home.

Furniture made from recycled hand brushed aluminum and recycled plastic is bleach cleanable. Hydrogen-peroxide-based cleaners may also be used, dilution level 1:10.

SUITABLE CLEANING AGENTS

Multi-Purpose Cleaners

Ethoxylated Alcohol, Diethylene Glycol, Monobutyl Ether, Sodium Laureth Sulfate
Such as: Spectaculo, Clorox Healthcare EZ-Kill Wipes, Lysol

Finished Floor Cleaners

Ethoxylated Alcohol, Sodium Carbonate, Sodium Citrate
Such as: Mr. Clean M.Net Professional

Chlorine Based Cleaners

Chlorine, Sodium Hypochlorite
Such as: Clorox Germicidal Bleach Concentrated, Clorox Healthcare Bleach Germicidal Cleaner and Wipes

Glass and Multi-Surface Cleaners

Sodium Dodecyl Sulfate
Such as: Terra Green Blue RTU

Deodorizer Cleaners

Butoxy Ethanol, Nonylphenol Ethoxylate, Sodium Meta Silicate Pentahydrate
Such as: Kork Rub

Healthcare Cleaners

Hydrogen-Peroxide 1:10
Such as: Clorox Healthcare Hydrogen-Peroxide Cleaner

Always ensure any residue is wiped off directly after cleaning so that the chemicals do not set in.

Alcohol based cleaners may appear to whiten the reclaimed polypropylene material. Should this occur, we recommend wiping it down with a lubricant such as WD-40 to remove any residue and restore the surface.
